

# Space Elf Landing Pad assembly

**1. After removing all pieces from the sheet with a hobby/utility blade, assemble parts as described below.**

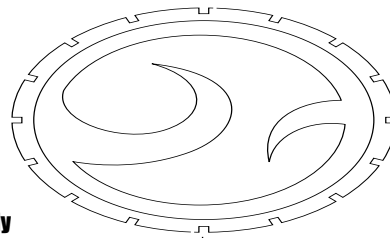

**2. Prime with flat enamel spraypaint for best results.**

This locks onto the notch on the front of each of the uprights

**x8**

This disc locks onto the protruding pieces of the arcs to make a slightly raised center

Every other spoke receives one of the short arcs

Every other spoke receives one of the tall arcs

Each of these small pieces is placed in the 8 slots between the spokes
